

bSMART™ Risk and Compliance

Navigate the dynamic challenges of today's business environment
Butchko, Inc.'s bSMART™ platform provides streamlined data gathering and an enhanced understanding of your operation.

bSMART™ Benefits:

- Dynamic Analysis of Risk
- Integrated User Operations Data
- Smart Surveys for Streamlined Data Collection
- Management Dashboard for Visualized Results
- Key Performance Metrics
- Integrated Program Management
- Text and Email Alerts
- Benefits realized across the Enterprise
- Hosted or Standalone Applications
- Desktop and Mobile Ready
- Enterprise-Class Encryption and Security
- ISO 31000 Compliant

Leverage Information for Responsive Risk Management and Continual Compliance Validation

Butchko, Inc. designs security solutions that safeguard your assets, mitigate your risks, and, most importantly, deliver sustainable business value. Uniquely qualified to understand security environments, your organization and your goals, Butchko aligns the Right Technology, Right Process, and Right Resources to take your program to the next level. We drive client success by integrating technology, information, and processes, to create an engineered, cost-efficient, and comprehensive solution that delivers critical information when and where it is needed.

Our experience spans the following industries:

- Oil & Gas
- Mining & Energy
- Industrial
- Pharmaceutical
- Healthcare
- Critical Infrastructure
- Financial / Banking
- Retail
- Government
- Transportation
- Education
- Manufacturing
- Intelligence

bSMART™ Risk - Flexible Risk and Threat Analysis

bSMART™ is an Enterprise-Class Risk Assessment Software Tool, that provides in-depth understanding of risk, from strategic planning through crisis management, giving leaders an edge to successfully navigate dynamic challenges.

bSMART™ Risk extends risk assessment from an established strategic planning resource to an **up-to-date decision support system**. This is achieved through **consistent, predictable, and defensible** risk assessment of complex risk. **Assets** (tangible and intangible), **Threats** (natural hazard and manmade), **Vulnerabilities**, and **Protective Measures** are all addressed. Trends and indicators can be analyzed by company, industry, geographic region, etc. Once the initial analysis is performed for a site, product, process, or enterprise, bSMART™ becomes a **“what if” tool** for business planning, crisis & emergency response planning, and tabletop training exercises.

Users are able to **define, develop, and implement highly effective programs** for security, business operations, emergency planning, safety and more.

bSMART™'s **management dashboard** shows current conditions and shifts in key risk elements as conditions change, alerting leaders and providing current information to support immediate decisions.

bSMART™ Risk is compliant with all major risk assessment standards and methodologies.

- ANSI / API 780
- NERC Critical Infrastructure Protection (CIP)
- C-TPAT and NEEC
- FEMA 452
- ISO31000
- ASIS International
- Sandia Risk Assessment Methodology (RAM)

bSMART™ Compliance

bSMART Compliance™ performs and manages compliance processes, allowing for audits and management tracking from individual sites to enterprise-level operations.

bSMART™ Survey

Working in concert with bSMART™ Risk or bSMART™ Compliance, bSMART™ Survey is a fully customizable data gathering system. System administrators design survey questions to collect information about Assets, Threats, Vulnerabilities, Events, and Protection Measures. Survey responders complete online questionnaires and results are automatically integrated into the risk and compliance engines.
